

# COPYRIGHT

Music

TV Show

Cooking Magazine

Copyrights are a form of protection granted to an author of an original, creative work. Whether they are the mouthwatering images in a cooking magazine, your favorite chef's challenge show, or the tunes you listen to while you cook; these were all created by artists. Copyrights help ensure that new works by the likes of photographers, authors, or musicians are encouraged and that these artists can get credit and compensation for their life's work.

## Why are copyrights important?

Much like the right a farmer has to reap what he sows or how you have the right to eat what you cook, copyright recognizes that authors have the right to benefit from the fruits of their creative juices.

Just like trademarks, one of the benefits of copyright is that it lets you know who created your favorite apps, music, art and writing. An artist can use copyright to prevent others from taking his/her creations and presenting as their own.

Copyright helps authors to turn their art into a way to make a living. In the kitchen we are always looking for the best ingredients to make our meals memorable, in the same way, artists use many components to create a hit. The passion and pursuit of the right ingredients takes time and money and the ability to make a living from their work enables them to create even more.
